2. GITHUB PROJECT BOARD

3. PROJECT OVERVIEW

3.1 PROJECT NAME

College Internship & Placement Portal

3.2 PROBLEM STATEMENT

College placement and internship opportunities are often shared through WhatsApp groups, emails, or notices. This makes it difficult for students to find all opportunities in one place, for the Training and Placement Officer to track applications manually, and for companies to review applicants without a structured system. This project provides a centralized web-based portal where the TPO can post job and internship opportunities on behalf of companies, students can apply and track their progress, and companies can review their applicants and update shortlisting decisions — with the TPO retaining full oversight of the process from submission to final selection.

3.3 TARGET USERS

- Training and Placement Officer / Admin
- College students applying for internships and jobs
- Companies, managed by the TPO in the initial version

4. FUNCTIONAL REQUIREMENTS

4.1 USER AUTHENTICATION

- Student, TPO and Company login
- Secure registration/login
- Role-based access control
- Password hashing
- Company accounts are created by TPO (companies do not self-register)

4.2 STUDENT PROFILE MANAGEMENT

- Students can create and update profiles
- Add branch, year, CGPA, skills, contact details, and resume link

4.3 COMPANY MANAGEMENT

- TPO can add and manage company details
- Store company name, location, website, and contact information
- TPO generates login credentials for company representatives

4.4 OPPORTUNITY MANAGEMENT

- TPO can post internship and job opportunities
- Add role, description, eligibility, deadline, package/stipend, and location

4.5 APPLICATION MANAGEMENT

- Students can view available opportunities
- Students can apply to eligible opportunities
- Students can track their own application status

4.6 TPO APPLICATION TRACKING

- TPO can view applicants for each opportunity
- TPO can filter applicants by branch, year, CGPA, skills, and status
- TPO can update application status

4.7 DASHBOARD

- TPO dashboard showing total opportunities, applications, selected students, and pending applications
- Student dashboard showing applied opportunities and current status
- Company dashboard showing their posted opportunities, applicant counts, and shortlist/selection progress

4.8 APPLICATION STATUS STAGES

- Applied
- Under Review
- Assessment
- Interview

- Shortlisted
- Selected
- Rejected

4.9 COMPANY PORTAL

- Company can log in using credentials provided by TPO
- Company can view students who applied to their posted opportunities
- Company can mark students as Shortlisted / Selected / Rejected
- Company cannot post, edit, or delete opportunities
- Status updates by Company are restricted to applications for opportunities owned by that company. TPO retains override access to all application statuses

5. NON-FUNCTIONAL REQUIREMENTS

5.1 SECURITY

- Passwords should be stored securely using hashing
- Only authenticated users can access the system
- Role-based access should prevent students from using TPO features
- Input validation should be used to avoid invalid or harmful data

5.2 PERFORMANCE

- Dashboard data should load quickly
- Search and filters should respond efficiently
- Database queries should be optimized for applications and opportunities

5.3 SCALABILITY

- The system should support many students and multiple companies
- Company login has been included
- More application stages can be added in the future
- The system can be extended to include notifications and resume uploads

5.4 USABILITY

- The interface should be simple for students and TPO staff
- Important information like deadlines, status, and eligibility should be clearly visible
- The dashboard should summarize key placement activity

6. ASSUMPTIONS & CONSTRAINTS

6.1 ASSUMPTIONS

- The TPO will post opportunities on behalf of companies.
- Students must register before applying.
- Each student can apply only once to the same opportunity.
- TPO has permission to update application statuses.
- Resume upload may be handled using a resume link in the first version.

6.2 CONSTRAINTS

- The first version will support Student, TPO, and Company roles, with Company access scoped to view-only on their own posted opportunities.
- Company login is included with view-only access to their applicants.
- The project must be completed within the internship timeline.
- Advanced features such as email notifications, resume parsing, and analytics may be optional.
